

Financial Information

Payment for services is the responsibility of you, as the parent or guardian of the child receiving services. You will be provided with a service invoice at the end of each month for services received. Direct payment from you is due at that time. Checks, Cash, MasterCard, or Visa are accepted at SMALL TALK.

Your Insurance Company

Many private health insurance companies do provide benefits for speech therapy services, while many others do not include such benefits. It is best to call your insurance company directly and ask for information regarding benefits for speech therapy. It is also strongly suggested you request information in writing rather than just verbal information over the phone. Also remember many insurance companies will provide benefits based on their reimbursement rate and you are advised to inquire about specific reimbursement rates and percentages allowed. Some insurance companies provide insurance coverage for evaluations only and do not make it clear their benefits are just for one evaluation session and not for ongoing therapy.

While we provide no direct insurance billing from this office, we are happy to provide you with the appropriate super bills, which are receipts for speech therapy services containing the relevant diagnosis and treatment codes. Periodically insurance companies may request documentation regarding speech therapy services and we routinely provide evaluation and updated progress reports as requested by insurance companies. However, it is important to remember we are defined as the service provider and never imply nor suggest any specific benefits your insurance company may or may not provide.
